

THE GLEICHEN CALL

VOLUME XXIX NO. 5

GLEICHEN, ALBERTA, WEDNESDAY APRIL 15, 1936

SUBSCRIPTION \$2.00 PER YEAR

DASHES FROM CRAIGANTLER AND DISTRICT

Roger Conat had a load to and from the bus on Sunday. The road was very bad so Roger used his team having Jack Stikle as assistant.

Tom Wilson was in the Craig district last week and bought a couple of pedigree hogs. It is Mr. Wilson's intention to raise high class hogs.

The roads are clear one day and filled in the next. So it is a hard job to guess whether you get back if you venture out any distance.

Bailey Schirber pulled his get-around (auto) into town to his in-laws seen to.

Mr. Sheets paid Gleichen a visit early Monday morning. Si was very sick and had been in bed for a week. He is entirely out of the ground. It will be remembered that a few years ago Mr. Sheets was manager of the Kan-Esk Klub Academy located on the shores of Craigantler's Loch Lomond. It was lack of interest but the depression that killed the club.

Carl Collins took a couple of loads of steers to Calgary for David McLean.

A nice time was spent at the home of Mr. and Mrs. Stanley Hall one evening last week, when a number of friends met to say farewell to Bert Hescock. Bert was generally a great favorite with all and said in a nice address that he was sorry to leave but would keep in touch with them. He was presented with a nice fountain pen, which he said he would always appreciate. A jolly time was spent with the Hescock family. Bert McLean sang the "Bachdancer Good by." Addison Wilson, Sandy Ferry, and Stanley Hall were deeply affected by the song. Everyone had a grand time and enjoyed the splendid supper supplied by the ladies. STThondthreen-ve teysba. SF

Dr. Giffen of Strathmore vaccinated the school children at Cananmor School for smallpox one day last week.

Mr. M. MacDonald was not in Calgary last week end. He is very much interested in having the school children vaccinated for smallpox.

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

April 13, 1916
W. H. Baker of Namaqua announces a meeting at his house for Saturday to arrange for a celebration on May 24th at Namaqua.

R. Davis and P. Larmer of Calgary spent a few days here last week goose hunting. Several of the local shots have been busy and several families have been having goose for dinner.

Meers, Bennett & White arrived last week from Calgary to build T. H. Beach's new store and the addition to J. A. Ramsay's store. Most of the material is now on the ground for both places.

Mrs. B. S. Cory returned home Saturday evening with her son and wife.

Mrs. J. Grant of Craigantler has received official word that her brother, P. T. J. A. Vinnicombe of the 18th Battalion was killed in action.

The stampede fever is in the air. Henry Willard advertises \$250 for somebody to ride Ray. A pretty good offer.

Mrs. Larkins has returned home after spending a couple of months in Calgary.

G. W. Evans has leased the store formerly occupied by the Gleichen Pharmacy for the purpose of putting up a stock of furniture.

The officers and members of the Gleichen Masonic Lodge will motor to Strathmore Monday evening and exemplify the first degree at that point.

A famous Shorthorne herd of 200 registered head at Innisfail was purchased the other day by the Pacific Cold Storage Co. They will be shipped to Gleichen in a few days and offered for sale.

News Items of Local Interest

Miss Murray of Three Hills is at present visiting with Mrs. N. A. Riddell.

All the Gleichen teachers are taking in the teachers convention in Calgary this week.

To look at a rake, hoe or shovel gives many people a pain in the back. Even so its use improves the eyesight.

Const. A. Batts, formerly of Gleichen but for the past few months has been stationed at Brooks, has been transferred to Calgary.

Hugh Hamer, who is on the Royal

Bank staff at Grand Prairie, is spending his holidays here visiting his parents, Mr. and Mrs. H. Hamer.

A very good sized crowd attended the annual firemen's dance Easter Monday evening. As usual it was a real good dance and was enjoyed by all who attended.

Good Friday was an exceptionally quiet day in Gleichen. As it was a perfect spring day almost everyone spent the time strolling around in the sun.

Irvine Gove returned last week from attending the B.E.S.L. convention in Vancouver. He stated the convention was a most interesting affair and was largely attended. Mr. Gove represented the Gleichen Branch and will report the results of the convention at the first meeting of the local branch.

For a while Friday afternoon it looked as if the creek flowing through town might get out of its banks. Fortunately the peak of the flood was reached when the drain pipes were almost filled to capacity. The China boys located along the banks of the stream heaved a sigh of relief when the running water did not rise higher. They went back to work making more for some customers they expected.

BABIES AND A BACHELOR

(Christian Science Monitor)

No longer do they say—in Canada—"The hand that rocks the cradle rules the world!" A family quintet in a small Ontario town has changed that philosophical abstraction into a more practical consideration. From the humblest inhabitant in Trois Rivieres to the legislators in the Parliament at Ottawa comes a new refrain, and its note is one of jubilation: "The hands that rock the Dionne cradles balance birth."

Pulling their country out of financial quicksands, however, only occupies part of the quintuplets' playtime. They have put the braces on one of America's most interesting phenomena—the flight of the newlyweds to Niagara. Thero, alas, is tagged a tale of lesser jubilation. For, statistic, ever at the service of Midas, shows the Falls of sentimental memory neglected and Callandair a Mecca for bachelors and brides, and American tourist dollars to the tune of 200,000 dropped during 1935 into the lap of Canada.

But resuming the minister of finance and changing honeymooners' habits still leaves time heavily hanging in the Dionne nursery. Making Dionne keep her amanuensis, the babies will keep His Majesty King Edward VIII sitting up nights reading letters. As a nurse, they tell him, the Ontario Government is rather fussy.

Now, Britain's ruler is a man of many talents, but—he is a bachelors' king—he decides that when it comes to breaking up babies his knowledge is only second-hand. So he turned the problem over to the Governor General of Canada, who turned it over to the Dominion Secretary of State, who turned it over to the Lieutenant Governor of Ontario, who turned it over to the Provincial Minister of Welfare. He will decide whether Mr. and Mrs. Dionne's five daughters shall be returned.

Perhaps now that Niagara Falls

are said to be no longer America's first stop in the matrimonial excursion, they could be given to Dr. Dafouc, the charming little ladies as a passing toy suitable to their lively dispositions.

In Afghanistan the usual marriage ages are 14 for boys and 10 to 11 for girls.

We thought it was cold in Gleichen last winter, but, evidently it was nothing in comparison with the north country. We heard of a of a young

man who adopted the practice of going bareheaded, he took suddenly ill and is still in a very bad condition. Doctors state he frost his brains. Press dispatches also tell us of a milk

The Human Factor In Automobile Accidents

Commencing from about the time this appears in print the graph recording deaths and injuries from automobile accidents will take an upward turn and for the next few months remain at a high altitude, if history repeats itself, and there is no reason to believe it will not.

For figures of the past few years show no tendency towards declination in the toll of deaths and injuries taken by gasoline propelled vehicles in Canada. Figures recently released show that in the first nine months of 1935 the automobile was responsible for the deaths of 778 persons in the Dominion which means, if the same rate was maintained for the remainder of the year, an average of three a day for the twelve months.

Undoubtedly the incidence for the summer months in the prairie provinces is greater than its mathematical ratio to the Dominion for the whole year, when it is borne in mind that a larger percentage of cars in cold storage the greater part of the winter months in the west than in Eastern Canada.

Whether or not campaigns which have been conducted during the past winter over American radio chains and by distribution of literature through the mails and campaigns for safer driving which are planned by governmental and other agencies both in the United States and Canada for the coming summer months will be effective in reducing this terrible toll will not be known until the fall or winter.

But in speculating on the possible mitigating effect of such wide publicity on the future accident toll it must be borne in mind that results will only be measured by the extent to which each individual driver takes the lessons to heart as his or her own individual responsibility. If he or she adopts the view that the warning is not meant for him but for "the other fellow," results will be negative, for many who might generally be regarded as safe drivers suffer lapses at times and even take chances occasionally.

Analysis of figures and available data on automobile accidents demonstrate beyond peradventure that the great majority of such accidents are attributable to human frailty and human foibles rather than, for instance, defective equipment, despite the stress which is laid on the importance of cars being maintained in perfect mechanical condition by automotive supply firms sponsoring some of the "safety first" radio campaigns of the past winter.

This does not mean, of course, that defective equipment is not responsible for accidents but analysis of data shows that the number of accidents attributable to such causes is insignificant in comparison with the enormous percentage due to the actions of the man or woman while at the wheel.

Attention to this phase of the problem of safer driving is drawn by Merrill Denison in the first of a series of articles appearing the March issue of the Canadian Home Journal. He shows that out of 10,913 cars involved in auto accidents in Ontario the first nine months of 1935, less no. 10,296 were classified as in "apparent good condition," that is, steering mechanisms were all right, brakes were in good condition and lights and tires were not defective.

The writer further reports that out of 10,685 of these accidents studied by the Motor Vehicles Department that province 10,296 were classified as "normal." Only 124 were suffering from extreme fatigue, which probably meant they were asleep, only 110 were intoxicated and only 35 had physical defects.

All of which means nine out of every ten accidents could not be attributed to defective equipment or abnormality in the drivers.

"What interpretation can be placed on these figures? Do they not point to the fact that bad driving is at the bottom of the trouble?" pertinently asks Mr. Denison, laying the foundation for a suggestion that women can be an important influence in instilling safety into drivers. This they could achieve, he suggests, individually, by using their influence "to alter the driving habits and manners of the older members of the family," and collectively, "they can demand that the proven safety techniques be adopted in their cities and provinces; that educational courses be made a part of both elementary and high school curricula and that a greater portion of the tax money derived from motor vehicles be devoted to safety development before being diverted to other purposes."

Quints Speak French

No One Talks English To The Famous Babies

No one speaks English in the presence of the Dionne quintuplets, Dr. Allan Roy Dafoe said in London, Ont., before initiating a Red Cross Society campaign for funds. The children are the best known in the French language corner.

For the time being, Dr. Dafoe said, every effort is being made to get the babies away to a good start on French. Later they will be taught English.

The RAMSAY Co. 187 273 BANK ST. OTTAWA, ONT.

Qualified For King's Trophy

South Africa Well Ahead In Miniature Rifle Shoot

Younger Canadian marksmen failed to qualify for the king's trophy for miniature rifle shooting amongst boys of the Empire in 1935 but cadets and others from the Dominion won the largest number of silver and bronze medals for individual high scores.

The competition was won by South Africa with 82 points. Great Britain was second with 77, and New Zealand third with 70. Australia and India, like Canada, failed to qualify.

Improving On Nature

Dr. Lloyd R. Watson, Alfred University, Ithaca, N.Y., has developed his breed of honey bees. Granted a Guggenheim Foundation fellowship, Dr. Watson will try to develop fuzzy bees with longer tongues. The ones he has bred are pollen better than present types, but their tongues can't reach as deeply into the hearts of honey bearing flowers.

Want Representation

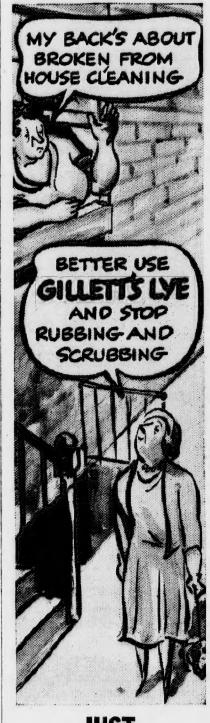

Western Producers Wish To Be Present At Imperial Conference

The Dominion government would be asked to invite organizations of primary producers to nominate representatives to accompany the government representation in an advisory capacity to the imperial conference in London in 1937. It was decided at the third meeting of the Western Agricultural Conference in Calgary.

The resolution also requested each branch of the agricultural industry to send the export field to be represented at a proposed conference of British Empire primary producers to be held prior to the imperial conference.

Another adopted motion said that if the supreme court of Canada declared the Natural Products Marketing Act valid, the conference should urge the Dominion government to seek the co-operation of the provinces to ensure that its terms be immediately supported by uniform enabling legislation in each province.

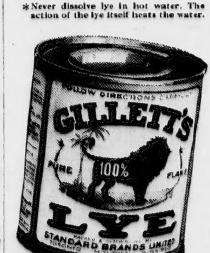

With wings measuring 12 inches across, the Atlas silk moth is the giant of its kind.

JUST WASH THE DIRT AWAY!

Gillett's Pure Flake Lye actually washes off dirt without hard scrubbing. Just use a solution of 1 teaspoonful dissolved in a quart of cold water. It cuts through grease, takes out stubborn stains. Use Gillett's Lye for all heavy cleaning. To clean stopped up drain pipes, too—and for toilet bowls. It kills germs, banishes odors—and won't hurt enamel or plumbing. Get a tin—today!

*Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The Gillett's Lye Booklet tells how to use this powerful detergent for all kinds of cleaning tasks—also gives full directions for good homemade soap, and how to keep laundry bright and clean. Send 10 cents at once. Get your free copy. Write Standard Brands Ltd., Fraser Ave. & Liberty St., Toronto, Ont.

Century-Old Drive Repeated

Characters From Dickens Live Again To Commemorate His

Celebrating the 100th anniversary on March 30 of the publication of "The Pickwick Papers" by Charles Dickens, the famous Commodore Coach—the actual coach which bore the Pickwickians to Rochester 100 years ago—is set forth in London in a golden cross with its "united of illustrious passengers."

The departure of the coach was part of the elaborate celebration arranged by the Dickens Fellowship and other devotees to celebrate the centenary of that immortal work.

Mr. Pickwick, rotund and exuding dignity through his spectacles, was hoisted aloft, followed by Mr. Tupman, elderly but impersonal where female charms are concerned. Then there mounted the poetic Snodgrass, with Winkle, the would-be sportsman. Last of all came the sportsman Alfred Jingle—with long black hair, green coat and brown paper parcel sticking out of his pocket just as it did a century back. Bertie Mills, who owns the Commodore, was the coachman.

Thousands of city workers, pouring from very modern tubes and motor buses, paused to admire the Commodore with its great yellow wheels, black body, four spanking horses, and its scimitar-guard playing a merry fanfare on a horn.

The Dickens Fellowship was holding its 49th convention simultaneously with the celebration. A total of 48 branches were represented, including Toronto, Edmonton, Victoria, Vancouver, Philadelphia, Copenhagen and Brisbane.

Alberta Dry Belts

Recommend Unproductive Areas Should Be Put Under Special Act

The section of the dry belts in Alberta where unproductive soil, or unfavorable weather conditions, have made farming operations hazardous, should be placed under the administration of the Special Municipal Areas Act, according to the recommendations of the special survey committee, headed by O. S. Longman, provincial field crops commissioner.

The committee, appointed by the former government last year, made an extensive study of the whole problem of farming in dry areas.

It recommends that areas administered under the act should adopt a direct relief system and that special agricultural relief should be discontinued.

Development of water resources, small irrigation projects and improved farm cultural practices also are recommended.

Northern Transportation

Big Tractor Hauls 34 Loads Of Spruce Logs In Bush Country

Northern transportation circles experienced a thrill recently when all records for log road hauling were smashed by a 70-horsepower Gillett's Diesel tractor. This record was set up at the Sippanok River camp of the Pas Lumber Company. The big tractor was driven nine miles back into the bush, hitched onto 34 big loads of spruce logs, and successfully dragged the logs into the mill yards. Sippanok River camp is located 70 miles northeast of Nipawin.

The log train extended almost 300 yards from the tractor, and estimated weight was close to 1,400 tons.

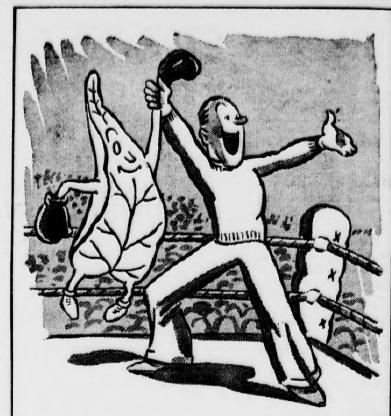

E. J. Morris, formerly of the city engineer's department, Regina, was at the controls of the tractor. He was once a Regina Flying Club member and was known at Balfour Technical school.

Possibilities Of Television

Interesting Developments Sure To Follow In Its Wake

Television may bring with it "sound-conditioning" apparatus capable of throwing a shroud of silence about homes, factories and other buildings. Mr. Andrew W. Cruse, chief of the electrical division of the U.S. Bureau of Foreign and Domestic Commerce, described this and other developments that may follow in the wake of television. He said, however, that the plans are far from the practical stage. Besides "sound-conditioned" buildings, he foresees the perfection of various kinds of apparatus for revealing an enemy's war manoeuvres, for vastly speeding up commercial transmission of messages, and for aiding science.

The safest time to drive an automobile is between six and seven in the morning, on Wednesday, according to a survey of accidents in Pennsylvania.

Idea Was Original

Man Used Ice Disk Successfully In Gas Meter

Gas inspectors of London accustomed to finding tin disks, medals, buttons and foreign coins in original meter cases give the palm for originality to a business man who has been using disks made of ice. Large amounts of gas had been used by this consumer, but whenever the collector called to empty the meter few coins were found. It was noticed too that the meter was exceptionally damp. Investigation convinced the authorities that the consumer had been dropping ice disks in the slot instead of coins.

SELECTED RECIPES

DATE BROWN GEMS

3 tablespoons butter
1/2 cup brown sugar
1/2 cup milk
1/2 cup water
1 cup Quaker Natural Bran
1 cup Quaker flour
1/2 teaspoon salt
4 teaspoons baking powder
1 cup dates (stoned and chopped)

Method: Cream butter and sugar, add well-beaten eggs, milk and water. Sift in flour, salt and baking powder. Beat well, stir in dates, and pour in greased pan. Bake in moderate oven. Temperature: 375 degrees F.

Very Heavy Colunge

Carl Salserson of Chimney Rock, Wash., collector of old documents and coins, has a coin worth \$2 when it was minted in Sweden in 1749, that weighs 3 1/2 pounds. The large money was coined when Sweden was at war with Russia and Denmark, to prevent money from being sent out of the country.

Catherine the Great, on finding an early spring violet growing in a park, placed a sentry over it so that it would not be plucked. She forgot to rescind her order, and sentries guarded the spot for 150 years.

Relief Loans

Federal Government Advances More Than \$11,000,000 To Provinces Outstanding loans from the federal treasury to the provinces under relief legislation amount to more than \$11,000,000, according to a return filed in the House of Commons at the request of W. M. Ryan (Lib., Saint John-Albert).

Only four provinces share in these loans, as follow: Manitoba, \$15,028,000; Saskatchewan, \$46,834,986; Alberta, \$22,779,000; and British Columbia, \$26,947,580.

Additional loans to the provinces still outstanding, arising from the Dominion housing loans of 1919 were reported as follows: Prince Edward Island, \$3,500; Nova Scotia, \$682,000; New Brunswick, \$648,700; Quebec, \$2,669,687; Manitoba, \$1,095,000; and British Columbia, \$1,701,500.

In Both Languages

Radio News Service Is Furnished In French And English

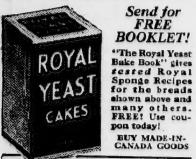

"Radio News Service," carrying news of programs artists and schedules, has been furnished newspapers, magazines and broadcasting stations in both French and English, according to the Royal Canadian Mounted Police to a question asked by Joseph Mallette (Lib., Jacques-Cartier). Marine Minister Howe said the service had been given since July 1 last at a cost, for the first six months, of \$660.

FLEMING'S FOLLY

— BY —
LAWRENCE A. KEATING

SYNOPSIS

The story opens with Link Fleming addressing a meeting of Bow County citizens, called together with the object of forming an irrigation company.

The meeting terminated but Buzz Hamilton and Helen and Kigo stay behind and Helen asks Fleming questions about his irrigation plan. This angers Buzz, who accuses Fleming of trying to ruin his sister and his assets, ruin his "spread." Buzz shoots at Fleming in an uncontrollable fit of anger, but Buster Townsend, Link's foreman, who is also a member of the company, is uninjured. Buzz is arrested and sentenced to three years' imprisonment.

Helen and Fleming form a partnership to provide irrigation for their own properties.

Fleming goes home and studies the plan drawn by Link to see whether it could be adapted to a smaller scheme suitable for his and Helen's land, and is satisfied it could be done. Feeling cold, he lights a fire and there is an explosion that wrecks the house, burns it and the plans and renders Link unconscious. He is rescued from the blaze by an employee.

Link and Link ride to Rawhide for supplies and to obtain funds to carry out the dam project. They meet Roper, who greets Helen and offers to help her with the money to see the Sheriff, who tells him Buzz Hamilton has been paroled, and would arrive on the incoming stage, but Link thinks Link has made a mistake in paroling Buzz.

Buzz Hamilton arrives back in Rawhide while Fleming and Helen are in the bank getting a loan for their project. They are joined by Roper, Kigo and Jackpot Mell meet him and he goes into the saloon with them. By the time his sister Link comes to see him, Buzz has had several drinks. Roper has distorted the facts concerning the dam proposal to Buzz, making it appear that Link was trying to ruin him. Buzz, in a fit of anger, tries to throttle Fleming, but is thrown to the floor. Then Helen appears and tells Fleming she has been robbed of the \$800 they had obtained from the bank.

(Now Go On With The Story)

CHAPTER X—Continued

"Yuh can't fool me, Link Fleming!" The words spilled in a torrent from his quivering lips. "I got the truth about yuh an' I got it right. Did you think there wasn't anybody in town man enough to put me in this scheme too, if you weren't so blind in love he's got yuh buffaloed!" Every time he holds your hand..."

"That's enough, Hamilton!"

Turned him on her almost savagely. "You ought to see through it yet yuh don't. You've got control of the spread; I haven't, and Kigo wanted to get for me. You, you'd see through this scheme too, if you weren't so blind in love he's got yuh buffaloed!" Every time he holds your hand..."

"That's enough, Hamilton!"

Shamed so that her countenance fairly glowed with blushes, Helen looked away, uncertain how to deal with her drink-roused brother, ratiocinating sentiments obviously not original with him. "Please, we're letting the first hour we're together again! After I've—I've prayed for you, and hoped for—"

"That's all right," he growled.

"But I can't see how yuh ever fell for Fleming's lingo about that dam. There isn't a rancher in the county that has faith in it. Soal Torney said it wasn't any good, didn't he? You're shore to break out spread—trying to irrigate a heap of sand!"

He pulled his threads toward the footings of the Captain Range a few miles away, topped by jagged peaks rising into serene blue sky. "That wasteland'll never be anything, no matter how much money yuh pour into it," Buzz declared emphatically. "Waterin' twenty cent ground!"

Link stared where he indicated but scarcely saw the yellowish expanse beyond low-lying buildings of the Triple H Ranch, on whose property they now rode. He was wondering how to win Hamilton's confidence, and bitterly reproached himself for having knocked the bottle away. Yet he knew right of Buzz

drinking was like a knife turned in Helen's flesh; he had been forced to the move by the bitter misery in her soft eyes.

"Hold on, oldtimer," he said in a controlled tone. "I don't think it'll be so bad after all. Silver Creek's only thirty-two feet across where we're damming it. There are rock sides to a depth of water. Of course we'd cut off when the dam's being laid, and we're digging irrigation ditches through that wasteland."

"We've got a good engineer in charge," he went on, watching hopefully for even a modicum of interest. "His name's McLendon, and he's built a lot of dams. It's like this," he continued. "I'm standing seventeen-twenty-sixths of the cost, assuming a cost of \$100 per acre, and I expect to have seventeen hundred acres to Helen's—yours—nineteen hundred."

"I'll admit, we're hard pressed for money, Buzz. Had to raise first mortgages on our spreads, and we gave a note for that eight hundred that was just stolen. But what if folks do call it Fleming's Folly? Instead of a couple of days they'll change their tune. Because the Silver Creek Dam will be working mighty quick now, something can stop us. We're going to increase the value of the Triple H and Star Loop at least three hundred per cent if you ask me, a thousand per cent!"

Ending, he was conscious of Helen's eyes upon him, wide and shining with enthusiasm. Link smiled at her, then glanced at Buzz. His upper lip was curling.

"Yeah?"

It curdled plainer than words the deep-set intractability of the man. It was as if he had called Link a liar, as if he had sneered: "I'll never work, and even if it does, I won't leave it!"

The partners exchanged discouraging looks. Buzz Hamilton's homecoming was not a success. If anything, he was an added obstacle, a thorn in their path, where already there were so many...

CHAPTER XI.

Driving rain in the Triple H yard the riders saw two men in nondescript gear seated on the edge of the ranch house stoop, looking as if they had waited there some time. The pair rose with deliberation and ambled forward while Link and Helen exchanged questioning glances. "Howdy, boys," Fleming greeted, uneasily aware of a truculent note in their bearing. "Anything wrong at the dam?"

One of the men, his leather face thickly blacked with beard, spoke up. "There's plenty wrong at the dam. We want our wages and we ain't doing another top of work till we get 'em!"

"Send ya'll pay us twice a month, didn't you?" growled the other. "We're weeks behind now. How about it?"

Link felt Helen and Buzz watching him and knew the girl was troubled, while young Hamilton's countenance were renewed decision. He forced a grin and gestured placatingly. "Boys, you don't need to worry about that money."

Tug Orlike turned to the girl. "You're partners with Fleming, Miss. How about it?"

"I'm sure you will be paid," she answered promptly. "But Mr. Fleming and I are rather hard pressed right now, and—er—it may be necessary for you to give us a little more time."

They exchanged significant looks.

"We know why yuh went to town this mornin', Fleming. Somebody's gonna throw yuh into bankruptcy, the cement guys or somebody. Yore creditors are holdin' for cash same as us guys world on yore for dam. I don't know if wages get paid first, so there ain't gonna be any way for yuh to wiggle outta that!"

Surprise flooded his lean countenance. "Somebody's fooling you, boys. I don't know anything about creditors throwing us into bankruptcy." He turned to Helen. "Do you?"

She shook her head. "Of course not. The dam will be finished."

"Mean to say yuh didn't go to Rawhide to fix things?" demanded Orlike with suspicion.

Tug, Miss Hamilton and I went to Rawhide to—meet Buzz. He was just paroled to me, and that little affair last Fall is all forgotten. I wish," he added an idea struck him, "that you'd spread the word around. Buzz has paid his debt and he's making a clean start." Jack, I reckon if your brother'd come home after being away—you'd go meet him, wouldn't you? That's what Miss Hamilton did, and I went along."

He flashed him a grateful look. Even the ex-convict seemed impressed with Link's words, and it seemed that Buzz straightened and threw his shoulders back.

Stomach" At Times. Eat
None to Relieve.*

Doctors say that much of the so-called "indigestion," from which so many of us suffer, is really acid indigestion—brought about by too many acid-forming foods in our diet. And there is now a way to relieve this—often in minutes.

Silently take Phillips' Milk of Magnesia after meals. Almost immediately this acts to neutralize the stomach acidity that brings on your trouble. You "forget you have a stomach."

Try this just once! Take either the familiar liquid "PHILLIPS'®" or, now the convenient new Phillips' Milk of Magnesia Tablets. Both are safe and effective.

As in Table Form:

Phillips' Milk of Magnesia Tablets and Phillips' Milk of Magnesia Drugs are everywhere. Each tablet contains 1/2 oz. of a special emulsion of a tea-spoonful of Phillips' Milk of Magnesia.

PHILLIPS'
Milk of Magnesia.
MADE IN CANADA

But how about wages?" insisted Helen. "Who do we get paid? We don't work for health!"

"Of course not," Tug told her right out, "we're pressed for cash, just like Miss Hamilton said. We make no secret of it. But there are arrangements under way to pay you, and if they shouldn't go through I'll figure out something else. If you go back on us now, we might go broke. Then I reckon you'd be out o' luck."

"But if you stick," he proceeded, watching their reactions. "I'll give you my word you'll get cash as soon as possible. And backin' me up, Miss Hamilton'll tell you the same thing."

Helen nodded, her eyes fixed hopefully on their grim faces. The pair shifted weight and pursed their lips. Finally Tug Orlike turned half away. "We got to find out what the others say they're waitin' at yore spread. We come over here to be shore there won't be any more paid on us."

"This information goes out from apprehension to his heart, and looking out of the corners of his eyes at Helen, he saw that worry possessed her as well. But they concealed their feelings and smiled tolerantly, as if the master would soon be adjudged.

"I'll ride over to the ranch with you, boys," Link announced. "Where's your horses?"

They went to fetch them behind the ranch house, and it did not escape Fleming that Kevin and Orlike had hidden their mounts from view of anyone approaching from Rawhide. This indicated, of course, that they would not come to the Triple H if they had known of the reception committee.

"Where's Buzz go?" he asked in a low tone, looking around.

A troubled expression came to her face. "He went inside. And, Link, I just know he has another brother of his own."

They stood a moment considering. "Well," he decided, "I reckon he better go talk to him."

But she touched his arm in relief.

VICKS COUGH DROP

straint. I know how Buzz is, very irritable when he's been drinking. Better if we let him alone, I hope," she added bravely, staring toward the mountains. "he hasn't started to be like he was before."

"You know," Helen went on in a tone of wistful regret, "Buzz was never like the rest of us. Father said when he was dying that I should be very careful how I treat him. Buzz—oh, he has temptations we don't feel. He can't resist gambling and drinking. It will be hard to keep him out of bad company."

The fervor of her anxiety carried straight to the Star Loop owner's heart. Fleming wanted to comfort her, relieve every little groove that marred the healthy brow showing under her Stetson. He gazed at Helen with eyes half-closed, the stern and sterner hand on his arm exerted pressure that proved she understood and was grateful.

"You've enough to worry about. Leave Buzz to me. How will you handle the men?"

He shrugged his shoulders. "Reckon they'll go back to work all right. But gosh, that eight hundred being gone makes things hard. You didn't even get a good look at the horses?"

"No. The bandana covered his whole face. All I have for a clue is that leather cuff I turned over to the sheriff."

(To Be Continued)

A Novel Burglar Trap

Not Only Protects Property But Also Catches Thief

A novel "burglar trap" which not only makes it impossible to rob a safe to which it is fitted but also catches the thief has been invented by a Budapest policeman. The device, which has been patented, is extremely simple. A special container in which is a quantity of a secret gas is fitted inside the safe, in such a manner that when the burglar's tool pierces the safe it also pierces the gas container. The gas, which is in a compressed state, misses out and overcomes the thief. The effects of the gas is enough to make any burglar fall asleep for several hours. The attempted thief is certain to have been discovered before he awakes and he can thus be easily arrested. The policeman-inventor, Joseph Waldram, has already received many inquiries from safe manufacturers in Hungary and abroad.

Had Its Advantages

Slower Travelling Found Drivers Alive At End Of Day

Only 30 years ago drivers an hour on a highway behind a horse were considered good going. Of course, the cruising radius of such a vehicle was only about 25 miles a day at the maximum. Ten years later 30 miles an hour was considered a fair clip. And so up to 60. Admitted, that if the tempo of all the surrounding life is accelerated, 45 miles an hour in 1936 may be faster in "relativity" than was six-an-hour in 1906; but it may have the above-mentioned advantage over 90-miles an hour that the motorists are still at the end of the day.

The point of the matter is that time has not grown 10 times more precious in 30 years; whereas life has not ceased to be sweet. If it is not sweet to the speeder, it still may be sweet to others on the same road.

They stood a moment considering.

"Well," he decided, "I reckon he better go talk to him."

But she touched his arm in relief.

Name Of Small Village

Tenant manager sought for restaurant with living quarters adjoining, at the railway station of Great Britain. So far no recent advertisement in a German newspaper.

The Great Britain mentioned is a small village in East Prussia with a population of 220. A neighboring hamlet called Little Britain has only 30 inhabitants.

PAINFUL JOINTS

often have a warning that your kidneys have been strained and need attention. Don't suffer needless pain. Take Gin Pills to obtain relief which is said to help your kidneys to function properly.

Little Helps For This Week

Blessed are the peacemakers; for they shall be called the children of God. Matthew 5:9.

Grant us Thy peace, down from Thy Throne, As on the thirsty earth cool night-TeXs sweet; Grant us Thy peace, to Thy pure pitchet recalling, From deepest, void of our worn and wandering feet.

Have you ever thought seriously of that blessing given to the peacemaker? People are always expecting to get peace in heaven, but whatever peace they get there will be ready-made. Whatever making of peace they can be blessed for must be on the earth here, not the taking of arms against its seas of trouble. Difficult enough we think, but very few of us really try. We complain of the want of many things, we want liberty, amusement, money, and which of us knows that he wants peace? We should ask God, whose chosen servant is the gift of peace, to pour it into our souls so that everything discordant may utterly vanish, and all that makes for peace would be sweet to us forever.

INDIGENCE, GAST

WHEN you feel unwell, or your stomach gives trouble with gas or "sour risings," try that well-known Dr. Pierce's Golden Medical Discovery, and Miss Mary MacIntyre's Royal Signature.

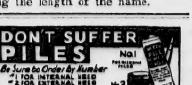

King Edward Still Writes Name With Familiar Flourish

King Edward, who has a new signature now that he's the monarch, has swung into writing his new name without any difficulty.

It's really just an improvisation on the old one.

When he was the Prince of Wales he signed his name "Edward P." Now it's "Edward R. I." Before becoming sovereign he always wrote the "P" after his name with a full loop. Now he adds a straight downward stroke to form an "R" and affixes a perpendicular line for the "I."

It still adheres to his familiar final flourish from the ending of the "I" of his name, the flourish running the length of the name.

Save "LEFT-OVERS" with Appleford's Presto Pack Waxed Tissue

Just hang a package in your kitchen. You'll be delighted with its convenience . . . for, with one hand, you can easily extract a single sheet at a time leaving the other hand free to hold the "left-over" being wrapped.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

Town & District

Quite a few of the local hockey fans plan to attend the professional hockey game to be played in Calgary.

K. R. McLean, Sight Specialist of Calgary, will be at Dr. Farquharson's office on Monday morning, April 20th.

Miss L. Eason spent the Easter holidays visiting her mother Mrs. Smith. Miss Eason is now living near Medicine Hat.

Judging by the conversation going on there will be several model gardens in town this year. Last year the bad storm in July made the model gardens a failure.

Colin McPherson a veterinary surgeon of Carlton died in Eventide Home last Friday morning. On Monday G. W. Evans shipped the remains to Edmonton for burial in the family plot.

T. H. Beach is holding an auction sale for Mrs. S. Beechfield at her farm next Monday April 20 at 1 p.m. This farm is located near Milk River, some five and half miles north and 1/2 miles east of Cluny.

The regular meeting of the First Gleichen Company of Girl Guides was held on Thursday, April 9th, at 7:15. Plans were made for the cribbage and bridge drive which is to be held on Friday, April 17, at 8 o'clock.

Old camp songs were practised at the meeting was closed.

The Shoprite Stores have of late been busy making many improvements to their store and are now in excellent position to attend to the wants of their customers. Today the store has installed a refrigerator and opening a meat market. Read their telephone for every information.

Mr. Lowden of the Tip Top Tailoring of Toronto was in Gleichen for a day last week. He spent the time with Ramsay M. Ltd., agents for the firm here. Mr. Lowden reports that he did a wonderful day's business, in fact it was one of the best he has had on his trip so far this spring. Evidently the depression is passing and the people are beginning to step out.

John T. Whate an inmate of Eventide home died last Thursday. The funeral took place Saturday afternoon to Eventide cemetery with Adj't. J. Sutherland in charge of the service. The late Mr. Whate had been in the Home for almost three years coming home from Calgary. He was born in England 10 years ago.

The Gleichen school pupils are busily preparing for the music festival to be held at Bassano in May. In order to raise funds to defray the expenses of the trip to Bassano and other requirements in connection with the dramatics a special concert will be given by the pupils who are taking part in the festival, in the Gleichen hall on Wednesday and Thursday evenings April 29 and 30. In the past years the programs at these concerts have been of a very high standard and the programs this year promise to surpass anything that has been attempted before. The admission will be adults 25c and children 10c for single admissions, or 35c. and 10c for both nights. The school children will be handling the sale of the tickets and it is hoped that the public will accord the worthy efforts of the children the generous support which has been given in the past.

ST. ANDREW'S W. A.
SALE SATURDAY
WELL PATRONIZED

The W. A. of the Anglican Church held a most successful Easter tea Saturday afternoon, in Dufee's Coffee Shop with Mrs. W. H. Busby as conductor. The tables were tastefully decorated with yellow daffodils in keeping with the season. Miss Irene Phillips, Miss Peggy Mrs. Freda MacCallum and Miss Winsome Carrick waited on tables. Mrs. T. H. Beaton had charge of the aprons which were held in competition with the test; each member of the W. A. having donated an apron for that purpose. These had a ready sale. Mrs. Phillips and Mrs. J. Gorrell conducted the sale of home cooking.

Mrs. S. Dufee looked after the selling of the daffodils, which were in great demand. Those remaining at the end of the sale were given to two of the oldest members of the Anglican W. A., Mrs. J. E. Ostrander and Mrs. A. E. Jones.

NEW LIBRARY IS
OPENED BY THE
LOCAL BOY SCOUTS

(By Elliott Evans)
The regular meeting of the Gleichen Scout Troop was held in the Scout Hall, April 9, with a very good attendance. The meeting was opened with "O! Canada" and then the

patrols took their turns for inspection. Standing of the patrols are as follows: Owl Patrol, amount for the night 129, total 1114; Crow Patrol, 147, 965; Beaver Patrol, 132, 934; Ram Patrol, 100.

After inspection a game was played and the Crow Patrol came out victorious. Commissioner H. H. was a visitor along with Geo. Evans for a short time. The meeting was closed with "God Save the King."

The scout master, assistant and patrol leaders had a short conference after the meeting.

A new library was opened with Denny Woods, Robert Black and Jimmy Swain in charge of it. If any books were set in it they would be appreciated, especially a dictionary.

SCOUT NOTES

"The Boy Scout Movement is a logical source of that type of need which would leadership which is based on courage, faith and determination." — Vice Chancellor A. E. Morgan o McGill University.

Abandoning dreams of some day seeking pirate gold in the South Seas adventurous Boy Scouts of Quebec and Ontario apparently are turning to gold seeking nearer home. Last year annual reports show that Quebec Scouts 33 in Ontario passed examinations qualifying them as prospectors. We'll wager the first scout min's will be called "Pieces of Eight."

Did the test in "the" ears? Last year 100 Ontario Boy Scouts demonstrated their versatility by properly washing clothes, and so qualifying for the Scout laundryman's proficiency badge.

The Southern Rhodesian Government has presented a seventy-five acre camp site in the famous Matoppe Hills to the Boy Scouts of that Colony. It is a unique coincidence that experience as a scout in this country during the Matabele war later gave Baden-Powell many stories which helped him to show Boy Scouts the interest and character training value of observation, tracking and deduction that enters into many Boy Scout games today.

The membership of the Boy Scout organization in Canada has increased more than 4,000 in a year. That means 14,000 more boys have a better chance of growing up into the best type of citizenship.

HOW AN EGG IS MADE

(Experimental Farms Note)

It has always been recognized that extremely complex processes are involved in the manufacture of eggs by the laying hen. The ovary and oviduct constitute the reproductive tract. The yolks are formed in the ovary and pass through the oviduct in which the various layers of albumen, the shell membranes and the shell are built around the yolk. Food material is carried by the blood stream to these organs and built into the egg. Different parts of the oviduct manufacture different components of the egg, such as thick white, thin white, shell membranes and shell. The general characteristics of an egg such as color, size and shape are determined by the kind of material that composes the nucleus of the egg of the individual hen. This material is inherited by the hen from her parents.

These facts have been known for sometime, but the interesting thing which has been discovered recently is the fact that the activity of the ovary and ovary is regulated by chemical substances carried by the blood stream. There are several of these chemical substances known, as reproductive hormones, each originating from a particular gland and each having a definite function in the process of egg formation. Of these here are two main hormones, the female hormone and the pituitary hormone originating from the ovary and pituitary gland respectively. The former causes the oviduct to grow and enlarge until it reaches the stage when it is ready to lay an egg, while the latter is manufactured and thrown to the blood stream by the pituitary gland and causes the ovary to grow and develop yolks and to pour female hormones into the blood stream.

The pituitary gland is the initiator of the productive process. Upon removal of this gland, the reproductive organs of both male and female birds shrink to an extremely small size; the males look like true capons and the females like pulardes.

The study of sex hormones on domestic poultry is one of considerable economic importance since these hormones regulate not only the processes concerned in producing eggs but those concerned in producing fertilized eggs of high hatching qualities.

Studies have been made on the processes leading with the relation between sex hormones and the mechanics of egg formation from which several interesting points have emerged.
